

Bredenoords Esaver, the energy saving generator

Peter Garritsen, Eurosonic 2012

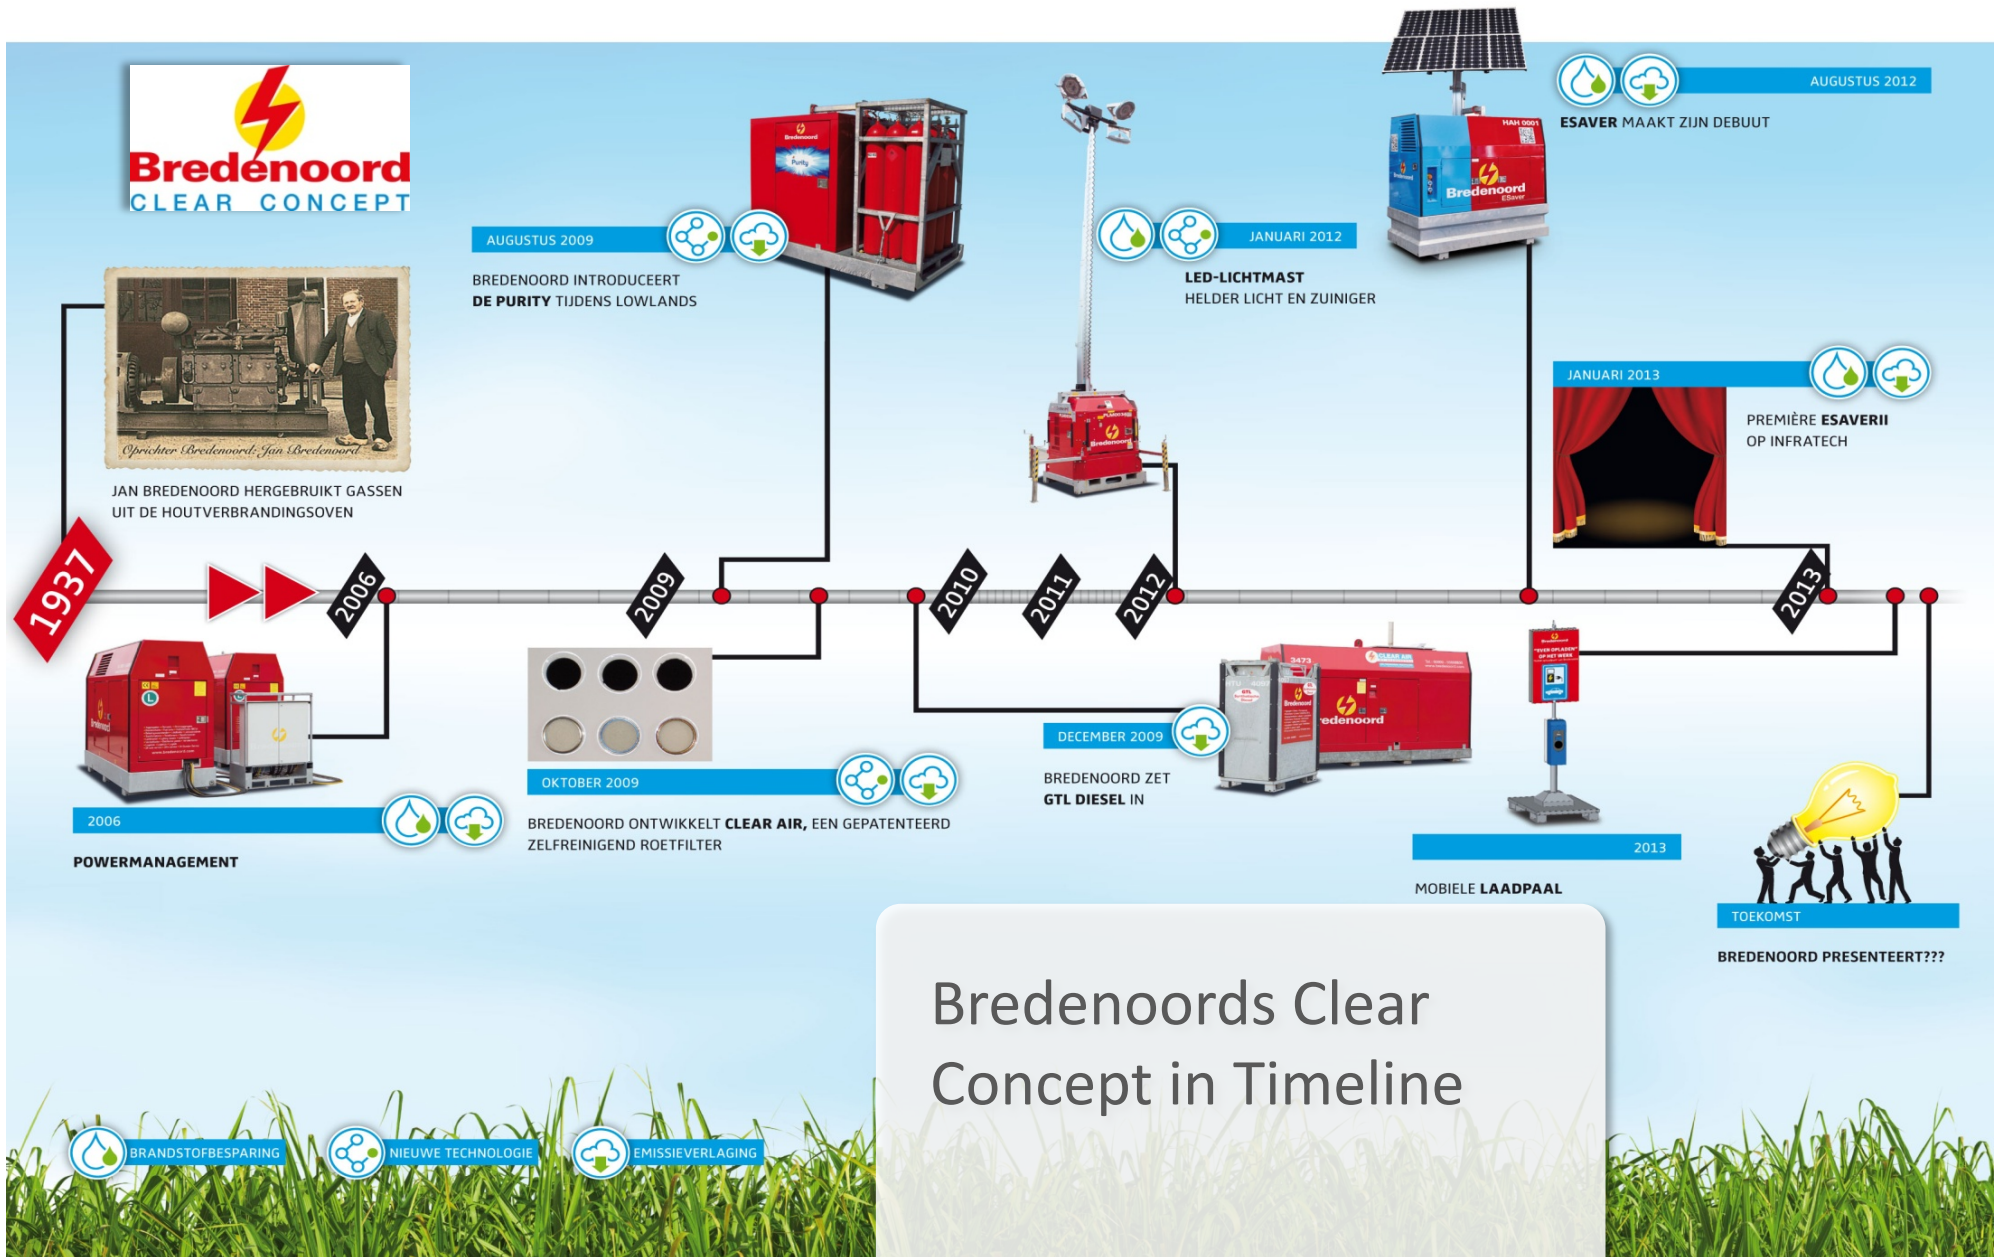

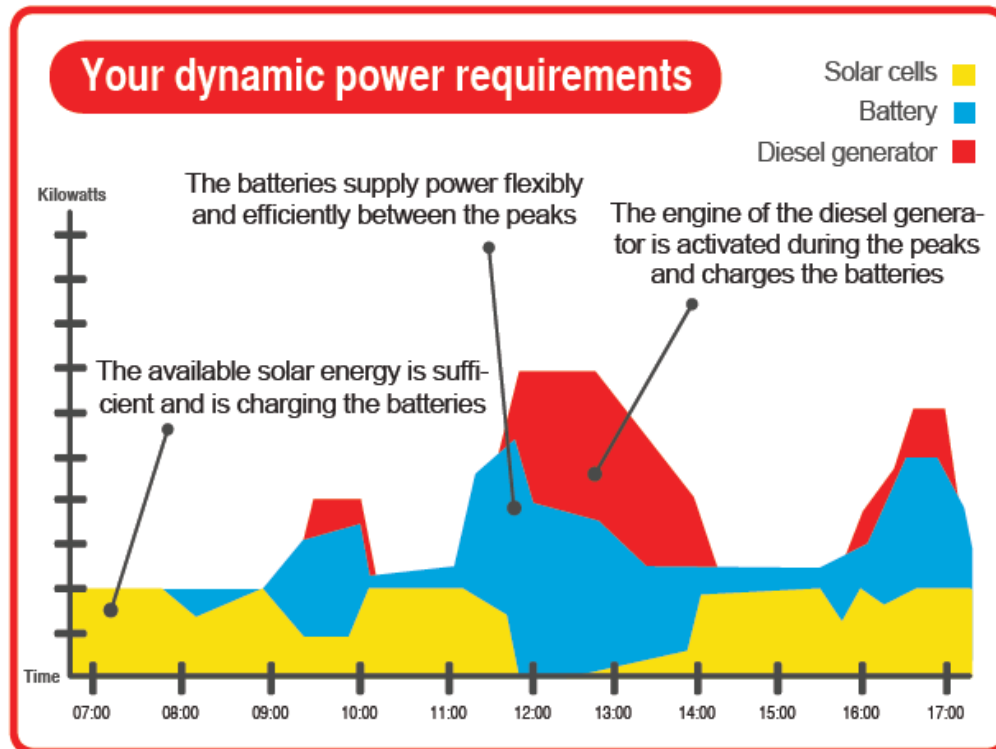

Bredenoords Clear Concept philosophy

Focus on 3 innovation aspects :

- Fuel
- Conversion technique
- Exhaust gas emission reduction
- Purity
- Clear Air
- GTL diesel
- LED Light tower
- Powermanagement

Esaver

- Battery
- Solar panels
- Small diesel generator
- Power intelligence

De Esaver saves up to 40% fuel

What will it bring to our customers?

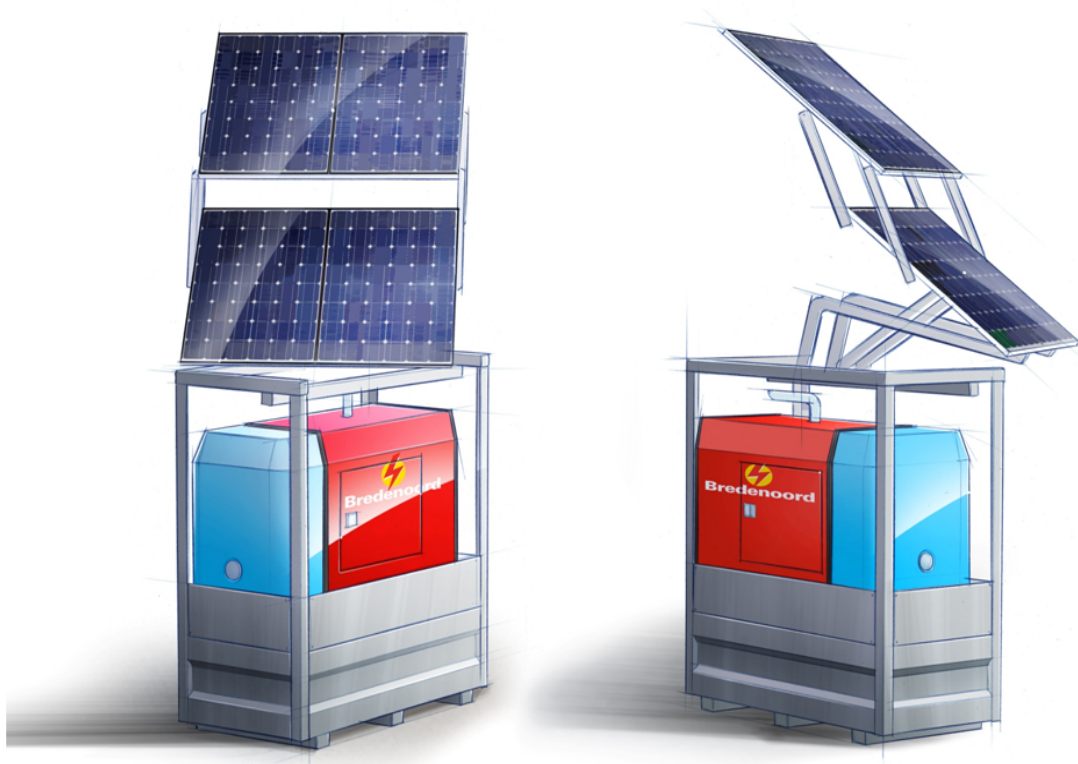

Current decision made on

- Rental price (running hours/days)
- NOT taken into account: fuel consumption or emission

We have to express our costumers TCO of mobile power on location

- Rates based on consumed power/days
- Does emission reduction have any value (€)?

The next months

- Technical field tests in order to determine and validate typical load profiles
- Calculation and validation of savings per load profile
- New price structure based on TCO
- Second pilot ready (15 kVA)
- 3 fase
- Further market introduction.
